
COMMENTS

- **Comments** are lines of code that are not run by the python interpreter.
- **Why we write comments?**
  - Communicate with other programers the intention of our code
  - Keep code human-readable
  - Place your own notes and reminders about what the code is doing

HOW WE ADD COMMENTS?

- One-line comment

```
# Comment on one line
```

- Block comments or multiple lines

```
"""
First line of comment
Second line of comment
Third line of comment
"""
```

```
'''
First line of comment
Second line of comment
Third line of comment
'''
```
