

→ what we just learned:

→ What we just learned:

- ☑ How to add single and multi line comments
- ☑ How to use the help function to get descriptions of function and statements in Python
- ☑ We learn the print function
 - ☑ It can have single or multiple arguments
 - ☑ Explore optional arguments used to modify the print output (sep, end)
- ☑ Common escape characters and how to use unicode symbols

ch01 Print and more

→ Goal for this challenge:

Create the code that generates the following output.

```
Console ▾ ⓘ ✕ Clear ⓘ  
First line.  
Second line.  
    This line is indented.  
\_(*-*)_  
School starts at 8 o'clock.  
School ends at 4 o'clock.  
"Take time to learn the closest  
thing that we have to a SUPERPOWER –  
Code"  
    – Sharen Eddings  
The 🌸🌸 make them 😊
